The Technical Data.

VOLTAGE : 230V / 16A

SINGLE PHASE MOTOR : 1,5KW – 2CV - Protection IP 55

VORM GEAR BOX : MVF 63 / FC R.1/7PAM 90

AIR COMPRESSOR : 230V / 50Hz - 1,2 KW - 210 L/min. à 8 BAR

GRAIN SIZE : 0-6 mm

HOPPER : Glassfibre - 75 L = 95 Kg Capacity

INVERTER : Electronic control.

RADIO CONTROL : Start / Stop

JET-GUN (Patented) : Aluminium fusion

SPAY PIPE : Rienforced rubber - diam. 19/31 - 8 m

DIMENSIONS : 87 x 56 x (h) 82 cm

COMPRESSOR WEIGHT : 11 Kg

STANDARD EQUIPEMENT :

N 2 heads for jet-gun (hole diam 8mm diam 10mm / Machine releasekey / pump access

Pipe washingsponges

Use and maintenance manual

ACCESSORIES ON REQUEST :

60 mm pump (mono screw) / Spray pipe 10mm / air pipe 10mm / mixer for motars 230V

Hook for lifting/machine / Kit for joints and cealing leaks / Kit for painting walls

3400 €HT

The answer to the request of a plaster-sprayer which is...

Portable-Compact and extralight

- *Practical on use*
- *Reliable and safe*
- *economic*

SOME ACHIEVEMENTS...

PORTABLE COMPACT AND EXTRALIGHT.

PRIMAX is the plaster-sprayer machine suitable for any kind of mortars on walls and ceilings, either indoors or outdoors. Compounds of sand and cement, chalk, plaster, resinous plastic and fire proofproducts, its size and weight makes it extremely interesting.

PRACTICAL and VERSATILE.

PRIMAX as got a hopper of glassfibre which is light and resistant. Its capacity is over 75 L of mixture. It can be hooked to be lifted by a crane. The body is made on ABS.

PRIMAX can be equipped by thee sizes of pumps.

RELIABLE and COMPLETELY SAVE

PRIMAX as been manufactured according to the european rules. A remote-control will start and stop the machine whenever it's required. The variable speed of the pumps is completely controlled by an "inverter".

MAINTENANCELESS

PRIMAX doesn't require much time to be cleaned, all its mechanical parts have been galvanized. The speed riduction-gear works on permanent oil. To replace the pumps (for different jobs) it takes only minutes. The air compressor can be easy removed for alternative use.

The mixer has got is own warm geared motor 230V and it's safely placed on top of the plaster machine but it can be removed in seconds for any reason.

The pistol spay-gun (patent) is made out of light alloy, it's very practical, easy to handle and to clean
